Education

iCEV – Instituto de Ensino Superior — Teresina, Brazil
B.Sc. in Software Engineering — *Expected Graduation: Dec. 2027*

Professional Experience

Prudêncio Advogados — Apr. 2026 – Present
Full Stack Developer — *Teresina, Brazil*

- **SaaS Platform Engineering:** Maintain and evolve the **WhatsJud** (AI-powered omnichannel legal CRM/BI) and **QuitePay** (white-label credit and collections fintech) ecosystems.
- **QuitePay (Fintech & BaaS):** Implemented CCB (bank credit note) issuance, installment settlement and Open Finance integration (Pix ITP) through the **Celcoin** API, on a multi-tenant architecture with RLS isolation and Deno Edge Functions.
- **Financial Resilience:** Built HMAC-signed webhooks with reprocessing and auditing via `pg_cron` for automatic reconciliation of pending transactions and dunning workflows.
- **WhatsJud (AI & Omnichannel):** Integrated LLMs (Gemini and Claude) for case triage and legal document generation, consumed public APIs (**Escavador**) and routed WhatsApp messages across multiple instances.

MedSafe — Nov. 2025 – Apr. 2026
Junior Full Stack Developer — *Teresina, Brazil*

- **Full Stack Java & Angular:** Promoted early to Junior for high autonomy. Developed scalable RESTful APIs in Java (Spring Boot) and dynamic Angular interfaces.
- **Performance & Database Optimization:** Refactored complex MySQL queries, cutting database response time by more than 35%.
- **Quality & Testing:** Wrote automated unit and integration tests with JUnit and applied Clean Code practices.

MedSafe — May 2025 – Nov. 2025
Full Stack Development Intern — *Teresina, Brazil*

- **Git Workflow & Version Control:** Worked in the team's GitLab flow, opening Merge Requests (MRs), resolving code conflicts and going through technical review with senior developers.
- **Teamwork & Agile:** Took part in daily stand-ups and agile ceremonies (Scrum/Kanban), helping with technical refinement and task estimation.
- **Product Support:** Handled support tickets, helped fix bugs in the Java backend and built and adjusted dynamic screens in the Angular frontend.

Featured Projects

Supabase Multi-Tenant SaaS | *Supabase, PostgreSQL (RLS), Deno, pg_cron, pgTAP* | GitHub Repository — Oct. 2026

- Open-source multi-tenant billing backend with RLS-based tenant isolation and roles (owner/admin/member), HMAC-SHA256 signed webhooks, replay protection and idempotent payment processing.
- Transactional outbox with `FOR UPDATE SKIP LOCKED`, exponential-backoff retries and dead-lettering; scheduled jobs with `pg_cron`; pgTAP and Deno test suites running in CI (GitHub Actions).

ChurnInsight (Hackathon ONE 2025) | *Spring Boot, FastAPI, Python, Streamlit* — Jan. 2025 – Jul. 2025

- Microservices architecture integrating FastAPI (ML) and Spring Boot, feeding Streamlit dashboards for predictive analysis of financial churn.

AMA Project (NGO) | *React, Firebase, NoSQL* | GitHub Repository — Aug. 2024 – Dec. 2024

- Serverless web platform supporting children with autism (ASD), with role-based access control (RBAC), clinical intake forms and routine management.

Technical Skills

Languages: TypeScript, JavaScript, Java, SQL, Python, HTML5/CSS3
Frontend & Mobile: React 18, Vite, Angular, TailwindCSS, TanStack Query, Radix/shadcn-ui, Capacitor
Backend, Cloud & BaaS: Supabase (Deno Edge Functions), Node.js/Express, Spring Boot, FastAPI, PostgreSQL (RLS), MySQL, AWS, OCI
DevOps & Tools: Git, GitHub, GitLab CI/CD, Linux, Docker, Railway, Vitest, JUnit, Swagger

Certifications & Languages

Languages: Portuguese (native), English (C1 Advanced – Cambridge Linguaskill), Spanish (B1)
Certifications: Oracle Cloud Infrastructure (OCI), Oracle AI with ML in Java, AWS Academy (Data Engineering, ML for NLP, Cloud Foundations), Red Hat Linux Fundamentals, Git and GitHub (Alura), Agile Management (Alura)
